Deputy Minister

Halifax, Nova Scotia
1985

- FOREWORD -

Over the past two decades, there has been an increasing reliance put on water resources by industry, municipalities and the general public. In Nova Scotia water usage is equally divided between surface and groundwaters and as population and industrial activity continue to expand, more emphasis is being placed on the management and protection of these essential resources by the various regulatory agencies. Consideration of both surface and groundwater resources are now an integral part of any overall environmental assessment of major developments and waste disposal facilities.

This document lists studies, reports and research papers relevant to the water resources of Nova Scotia currently available through the Water Resources Planning Section and the library at the Nova Scotia Department of the Environment. It is intended to be an aid to industry and the public, and it is hoped that future editions of this bibliography will be expanded to include references from other regulatory agencies and the consulting industry to provide an overview of water data available for the Province of Nova Scotia.

The available references are arranged in three formats: (A) geographic location, by County; (B) subject heading; and (C) source. Where applicable each entry is assigned a library acquisition number for easy retrieval from the Nova Scotia Department of the Environment library. Those entries having no number are available through the Water Resources Planning Section.

A code applied to each entry indicates the type of report presented in Section B:

HG - hydrogeological-geotechnical
R - research paper
TP - tidal power
WD - waste disposal
WQ - water quality
WR - water resources
WS - water supply

Section C organizes the bibliography alphabetically by author under the following headings:

NSDOE publications
NSDOE Internal Reports
Publications and Conference Proceedings
Consulting Studies
Outside Contributions
Theses

This bibliography was prepared by Mr. David S. MacFarlane and Mr. James H. Fraser, hydrogeologists, Water Resources Planning. We wish to express our appreciation to Mrs. Janice Laufer for her invaluable assistance, and Mrs. Ruth Garrison for expertly typing the manuscript.

This bibliography is on word-processor format and will be updated periodically as additional references are added. References may be acquired from the Nova Scotia Department of the Environment library by contacting Mrs. Janice Laufer, Librarian (424-5300). Other reports may be obtained by contacting Dr. C. L. Lin, P. Eng., Chief, Water Resources Planning.

A. J. Crouse, P. Eng.
